LeadsForceGen — Payment Gateways Guide

For Dipesh Karki · leadsforcegen.vercel.app · Prepared 23 October 2026
Sign-up email for every account below: **dipeshkarki8292@gmail.com**

1. What is live in your product today

Method	Market	Status	How it works
Manual payment (eSewa transfer + proof upload)	Nepal (NPR)	**LIVE**	Customer pays your eSewa ID **9814909258**, uploads a screenshot proof at checkout; you approve in the admin panel or with /approve in your Telegram bot; Pro activates automatically. Guide: your own checkout page.
Lemon Squeezy	Worldwide (cards, USD)	**CODE READY — activation pending**	Checkout + signed webhook are built into the site. Remaining: create the $19/mo product in your Lemon Squeezy dashboard, add the webhook, and paste 4 keys into Vercel (done together in your signed-in browser). lemonsqueezy.com

2. Free-to-join gateways, by where the seller is

"Free" means no monthly fee — every gateway takes a percentage of each sale. For a Nepal-based seller, the realistic worldwide options are the Merchants of Record (MoR): they sell on your behalf, handle global cards and sales tax, and pay you out.

Gateway	Website	Seller countries	Typical fee	Notes for you
Lemon Squeezy	lemonsqueezy.com	Worldwide incl. Nepal (check payout list at signup)	5% + 50¢	Already your primary choice; account created 22 Oct 2026. First to activate.
Paddle	paddle.com	Worldwide (approval review)	5% + 50¢	MoR like Lemon Squeezy; good backup if one declines. Signup needs business/identity review.
Dodo Payments	dodopayments.com	Built for emerging markets incl. Nepal	~4% + 40¢	MoR; KYC required. Strong second worldwide option.
Gumroad	gumroad.com	Many countries (payout limits apply)	10%	Simplest signup; high fee; better for one-off products than SaaS subscriptions.
NOWPayments	nowpayments.io	Worldwide (crypto)	~0.5–1%	For customers who pay in crypto. Optional extra rail, free to join.
eSewa ePay (merchant)	esewa.com.np	Nepal only	Per-transaction	The upgrade from manual proofs: real in-app NPR checkout. Needs a merchant account; merchant code/secret then go into Vercel like other keys.
Khalti (merchant)	khalti.com	Nepal only	Per-transaction	Same idea as eSewa ePay for Khalti users in Nepal.
Stripe	stripe.com	NOT available to Nepal-based businesses	2.9% + 30¢	Would need a company in a supported country (e.g. US via Atlas, $500 — not free). Not usable directly from Nepal today.

Razorpay	razorpay.com	India only (Indian entity + KYC)	~2%	Great for INR/UPI if you ever register an Indian business; not openable from Nepal.
PayPal Business	paypal.com	Nepal: receiving/withdrawing is restricted	~3.5%+	Not reliable as a primary receiver from Nepal; the MoRs above pay out through their own rails instead.

3. Your IDs — and where passwords live

Account	Your ID (email)	Password
LeadsForceGen admin panel	dipeshkarki8292@gmail.com	Set by you; stored only in the site's secure settings — never printed.
LeadsForceGen app (Pro user)	dipeshkarki8292@gmail.com	Same as your admin password (you set it).
Every gateway above	dipeshkarki8292@gmail.com	You create it on that gateway's own website, in your browser. API keys go straight into Vercel's environment page — never into chat, code, or a document.

Why no passwords in this PDF: a file containing live payment passwords would let anyone who ever sees it take over your money accounts. That is exactly the kind of document that leaks. Your passwords live in secure storage only; when a gateway needs connecting, we do it together in your signed-in browser, page to page — the same safe way Vercel, Supabase and Lemon Squeezy were wired.

4. Money management (already in your admin panel)

- Captured revenue, this-month totals, pending and refunded — per currency, never mixed.
- **New filters:** gateway, currency/market (NPR = Nepal, USD = worldwide), buyer email, date range — totals follow the filters.
- Per-gateway breakdown, active subscriptions with period ends, full payments ledger, manual-refund marking.
- Telegram bot: /status, /payments, /approve, /reject — money alerts arrive on every new manual proof.

Recommended activation order: 1) Lemon Squeezy (account exists) → worldwide cards live. 2) eSewa ePay merchant → one-tap NPR checkout replacing manual proofs. 3) Paddle or Dodo as a worldwide backup rail.
